CAREER PROFILE

Motivated and detail-oriented Computer and Information Systems student with a passion for software development and emerging technologies. Experienced in developing academic and personal projects that strengthen problem-solving, teamwork, and technical skills. Seeking opportunities to apply knowledge, learn from industry professionals, and contribute to technology-driven solutions.

TECHNICAL SKILLS

Category	Skills
Programming Languages	Java, PHP, JavaScript, C
Web Technologies	HTML, CSS, REST APIs
Framework & Libraries	Laravel, React, Bootstrap
Databases	MYSQL, Firebase
Tools & Platforms	Git, GitHub, VS Code, Postman
Concepts	Object-Oriented Programming, Database Design, Authentication Systems, CRUD Operations

SOFT SKILLS

1. Communication
2. Teamwork
3. Problem Solving
4. Troubleshooting
5. Time Management
6. Adaptability
7. Professional Development

PERSONAL INFORMATION

Field	Details
Languages Spoken	English, Nepali
Hobbies/Interests	Web Development, UI Design, Technology Exploration, Problem Solving
Driver's License	Available
Computer Literacy	Proficient

EDUCATION

Nishchit Gurung

Bachelors of Computer and Information System (BCIS)

Ongoing Pokhara University | Pokhara, Kaski, Gandaki, Nepal

Current coursework includes:

1. Data Structures and Algorithms
2. Database Management Systems
3. Web Development
4. Financial Management
5. Cloud Management
6. Information Security
7. System Analysis and Design
8. Operations Management
9. Principle of Marketing

Higher Secondary Education (+2)

2020-2022 Nepal Adarsha Secondary School | Waling, Syangja, Gandaki, Nepal

GPA: 3.45

Major coursework includes:

1. Accounting
2. Economics
3. Computer Science

ACADEMIC PROJECTS

KaryaSpace (Task Management System)

BCIS 6th Semester

Project | Sept 2025

Developed a full-stack web-based task management system designed for collaborative team workflow and productivity management.

Key Features

1. Role-based authentication and authorization
2. Project and task assignment
3. Space and project management
4. Kanban task board
5. Progress tracking system
6. Team collaboration features

Tech Stack

1. Frontend: Blade, Bootstrap
2. Backend: Laravel
3. Database: MySQL

Project Repository:

[GitHub - nischitgurung/KARYASPACE: Ecommerce website\(Demo\) · GitHub](#)

Billing Management System

BCIS 4th Semester

Project | July 2024

Developed a desktop-based billing management application to manage customer transactions, inventory, and billing records.

Tech Stack

1. Programming Language: Java
2. Database: MySQL

Features

1. Billing and invoice generation
2. Inventory management
3. Customer transaction tracking

PROFESSIONAL EXPERIENCE

System Design & Development Intern – Jan 2026

Nov 2025

Olgia Digital Pvt. Ltd. | Lalitpur, Nepal

Worked remotely on system design and development tasks while collaborating with the teams on Restaurant Management System using Waterfall Model.

Responsibilities & Achievements

1. Assisted in frontend and backend development activities
2. Participated in project planning and implementation discussions
3. Improved understanding of real-world software development workflows
4. Collaborated remotely using Git-based workflows and development tools

TRAINING , WORKSHOPS & CERTIFICATIONS

Python Workshop

Pokhara University | Apr 30 – May 4, 2024

Participated in hands-on Python programming sessions covering programming fundamentals and practical implementation concepts.

GMI Mentorship

Global Mentorship Initiative | 10th Sept 2026

Participating in professional mentorship focused on career readiness, career development, career planning, job search strategies, professional coaching, and mentorship, while working toward a Career Readiness Certificate.

ADDITIONAL SECTIONS

1. Active GitHub contributor with academic and personal software development projects
2. Interested in backend development, full-stack development, and software engineering
3. Continuously learning modern web technologies and development practices
